Why take something away that is working smoothly for the consumer?  
I don't believe the average consumer is receiving anything but top grade  
broadcasting thru XM Satellite Radio, so why add patronage to the bill?

I'm paying for these services; I haven't asked the government to provide any of the  
services; so why should the National Association of Broadcasters have the authority  
to tell me what I should listen to?

I enjoy XM Satellite Radio, I listen constantly, I relax by XM and I would think it  
would be a disgrace to the consumer to have this displeased ruling to decide what  
we listen to as adults.
